Downingtown, Pennsylvania 19335

✓ Chemical Leaman Tank Lines, Inc.
Lancaster Avenue
Downingtown, Pennsylvania 19335

Gentlemen:

Pursuant to the provisions of the Clean Streams Law, the Act of June 22, 1937, P. L. 1987, as amended, approval of your proposal to eliminate real and/or potential water pollution caused by the impoundment of industrial wastewater on the premises of William Dick located in West Cain Township, Chester County, is hereby granted. The proposal was submitted to the Department of Health on October 16, 1970.

The approval herein granted is subject to the following conditions:

1. Implementation of the proposal to abate the threat of pollution from the impoundment of industrial wastewater shall begin immediately and shall proceed as rapidly as weather conditions permit.
2. The wastewater impoundments on the premises shall be maintained throughout the duration of the abatement project in physically sound condition in accordance with the provisions of the Rules and Regulations of the Sanitary Water Board, Article 800, Section 2, adopted October 21, 1970. In accordance therewith, a permit shall be obtained prior to January 1, 1971.
3. Spray irrigation shall be performed subject to the following limitations:
 - A. Irrigation rate shall not exceed one-half inch per hour, two inches per week, applied one day per week, with a six day resting period between applications.
 - B. Application of wastewater shall be only on frost-free soil with low moisture content and shall not exceed the capacity of the soil to adsorb and retain the wastes.
 - C. No spraying shall be performed within 500 feet of any buildings.
 - D. The sequence of spray applications shall be along contour or upslope only.

AR100075

4. The abatement project shall be conducted in a manner that will not violate the provisions of the Air Pollution Control Act and the requirements of the Air Pollution Control Commission.
5. The Regional Office of the Department shall be given at least forty-eight hours advance notice that spraying of the wastewater is about to begin, and agents of the Department shall be permitted access to the premises for the purpose of monitoring and observing the progress of the project.
6. At the conclusion of the project, all wastewater impoundments shall be backfilled to approximate original contour so as to provide proper drainage and shall be seeded with appropriate vegetation so that adequate vegetative cover is present throughout the first growing season following conclusion of the project.
7. All activities shall be conducted under the direct supervision of technically competent individuals whose names shall be filed with the Regional Office of the Department prior to the commencement of the project.
8. The permission herein granted can be withdrawn by duly authorized agents of the Department if the conditions contained herein are violated or if the actions of the applicant (William Dick and Chemical Leaman Tank Lines, Inc.) result in real or potential danger of pollution.
9. The successful conduct and completion of the abatement project is the sole responsibility of the applicant and the permission herein granted shall not relieve the applicant of any responsibility or liability included in the provisions of the Clean Streams Act.

Please sign and return the enclosed copy of this letter.
